Journal of Radioanalytical and Nuclear Chemistry, Articles, Vol. 161, No. 2 (1992) 597–601

Index to Volume 161

No. 1

Applications of Radioanalytical Methods in Biology and Medicine

S. Landsberger (Urbana, Illinois, USA)
The instrumental determination of cadmium in biological samples at nanogram levels with the aid of a Compton suppression system and epithermal neutron activation analysis 5

A. J. Blotcky, J. P. Claassen, E. P. Rack (Omaha, Nebraska, USA)
Determination of human and Sprague-Dawley rat trimethylselenonium ion and total selenium urine concentrations from endogenous body selenium pool by neutron activation analysis 11

F. J. Cumming, J. J. Fardy, D. R. Woodward (Geelong, Victoria, Menai, NSW and Hobart, Tasmania, Australia)
Selenium intake of Australian breast fed infants 21

Sheng-Ming Liu, Chien Chung (Hsinchu, Taiwan, R. O. C.)
Trace elements in Taiwanese diet in different seasons 27

L. Tandon, E. J. Kasarskis, W. D. Ehmann (Lexington, KY, USA)
INAA for interelement correlations in rats after mercuric chloride exposure 39

K. J. Ellis, R. J. Shypailo (Houston, TX, USA)
Multi-geometry ^{241}AmBe neutron irradiator: Design and calibration for total-body neutron activation analysis 51

K. J. Ellis, R. J. Shypailo (Houston, TX, USA)
Total body potassium in the infant 61

A. S. Farooqi, W. Arshed, O. A. Akanle, C. Jeynes, N. M. Spyrou (Guildford, Surrey, UK)
Fluorine determination in diet samples using cyclic INAA and PIGE analysis 71

E. Ansoborlo, J. Chalabreysse, M. H. Henge-Napoli, E. Pujol (Pierrelatte, France)
Methodology for uranium compounds characterization applied to biomedical monitoring 79

Applications of Radioanalytical Methods to Geological and Environmental Science

R. R. Rao, D. G. Goski, A. Chatt (Halifax, Nova Scotia, Canada)
Determination of trace elements in acid rain by reversed-phase extraction chromatography and neutron activation 89

E. G. Burkhard, G. Mehmood, L. Husain (Albany, NY, USA)
Determination of trace elements in cloud water and aerosols using instrumental neutron activation analysis and hydride generation with atomic absorption spectrometry 101

G. Ingrao, P. Belloni, G. P. Santaroni (Roma, Italy)
Mushrooms as biological monitors of trace elements in the environment 113

Elsevier Sequoia S. A., Lausanne
Akadémiai Kiadó, Budapest

INDEX TO VOLUME 161

G. J. Evans, R. E. Jervis (Toronto, Canada)
Radiochemical studies of iodine behaviour under conditions relevant to nuclear reactor accidents 121

N. Gras, M. Thieck, L. Muñoz, S. Hurtado (Santiago, Chile)
Seasonal and geographical variability in some trace elements of Pacific Oysters (Crassostrea gigas) cultured in two different bays of Northern Chile 135

P. M. Padaki, E. L. McWilliams, W. D. James (College Station, TX, USA)
Use of Spanish Moss as an atmospheric monitor for trace elements 147

M. M. Ko, R. E. Jervis (Toronto, Canada)
Atmospheric toxic metal contributions from hospital incinerators 159

A. Al-Hashimi, S. S. Krishnan, R. E. Jervis (Toronto, Ontario, Canada)
Human hair as a pollutant dosimeter 171

S. S. Krishnan, R. E. Jervis, L. D. Vela (Toronto, Ontario, Canada)
Leachability of toxic elements from solid wastes 181

N. M. Spyrou, W. Arshed, A. S. Farooqi, G. I. Ibeanu, O. A. Akanle, C. Jeynes, O. I. Asubiojo, I. B. Obioh, E. A. Oluyemi, A. F. Oluwole (Guildford, Surrey, UK and Ile-Ife, Nigeria)
Usefulness of nuclear and atomic-based analysis techniques in air pollution studies in Nigeria 189

A. A. Rauf, R. E. Jervis (Toronto, Canada)
INAA of human scalp hair for environmental monitoring of Indonesian and Canadian population groups 201

Puling Liu, R. E. Jervis (Toronto, Canada)
Comparison of major and trace components of Chinese and Canadian soils 215

Wang Xiaolin, Liu Yinong, Chen Yinliang (Chengdu, P. R. China)
Neutron activation analysis of rhenium in rocks after preliminary extraction with acetone 227

R. Velazquez, R. Alviso, J. Facetti (Asunción, Paraguay)
Sediments of Ypacarai Lake 233

F. Flores, J. F. Facetti (Asunción, Paraguay)
Phosphorus availability from bottom sediments of lakes using a nuclear technique 239

M. A. Gouveia, M. I. Prudencio, I. Morgado, M. T. Magalhaes, J. M. P. Cabral (Sacavém and Lisboa, Portugal)
Distribution of Sc, Cr, Co, Hf, Ta and Th in a weathering profile of gabbroic rocks (Serpa, Portugal) 245

S. M. Matthews, A. J. Boegel, S. F. Eccles, S. G. Homann, D. W. Rice, J. A. Loftis, M. C. Jovanovich, R. A. Caufield, B. J. Mincher, D. H. Meikrantz, R. J. Murphy, G. L. Gresham, M. J. Connoly (Livermore, CA and Idaho Falls, ID, USA)
High-energy irradiation of chlorinated hydrocarbons 253

Measurement and Distribution of Radon and Radon Progeny

M. Osborne, J. Harrison (Research Triangle Park, NC and Washington, D. C., USA)
An overview of indoor radon risk reduction in the United States 265

J. Phillips, F. Marcinowski, K. Maconaughey (Washington, D. C., USA)
Two EPA approaches to radon surveys 273

A. Schmidt (Washington, D. C., USA)
EPA's approach to radon risk assessment 283

J. L. Gras, S. Whittlestone (Mordialloc and Menai, N. S. W., Australia)
Radon and CN: Complementary tracers of polluted air masses at coastal and island sites 293

No. 2

Measurement and Distribution of Radon and Radon Progeny (continued)

G. Espinosa, S. Ramos (Mexico, Mexico)
Indoor radon measurement methodology by solid state nuclear track detectors 307

D. M. Thomas, J. M. Cotter, D. Holford (Honolulu, HI and Richland, WA, USA)
Experimental design for soil gas radon monitoring 313

L. C. S. Gundersen (Denver, Colorado, USA)
The effect of rock type, grain size, sorting, permeability, and moisture on measurements of radon in soil gas: A comparison of two measurement techniques 325

N. E. Whitehead (Lower Hutt, New Zealand)
Detection of geological faults using a nuclear method 339

L. Zikovsky, B. Chah (Montreal, Canada)
Effects of meteorological conditions on outdoor radon daughters concentrations in Montreal 251

J. M. Barnett, J. W. McKlveen (Tempe, AZ, USA)
The measurement of ^{222}Rn in drinking water by low-level liquid scintillation counting 357

S. Lombardi, D. L. Pinti (Rome, Italy and Paris, France)
^{222}Rn behavior at the Latera geothermal field (Northern Latium, Italy) 365

G. M. Reimer (Denver, CO, USA)
Methodology for rapid assessment of the radon potential of soils 377

Measurement of Radionuclides in Environmental Studies

C. Gascó, L. Romero, E. Mingarro, A. M. Lobo (Madrid, Spain)
Geochemical aspects and distribution of long-lived radionuclides in marine sediments from Palomares 389

H. Nitsche, R. C. Gatti, Sh. C. Lee (Berkeley, CA, USA)
Low-level determination of plutonium by gamma and L X-ray spectroscopy 401

INDEX TO VOLUME 161

R. Stella, M. T. Ganzerli Valentini, L. Maggi (Pavia, Italy)
A novel approach to Ca–Sr separation in the determination of ^{90}Sr using inorganic exchangers: An application to environmental samples 413

A. P. Summerton (Adelaide, Australia)
Incorporation of natural radionuclides and rare earth elements into a salt tolerant plant 421

M. Pimpl (Karlsruhe, Germany)
Increasing the sensitivity of ^{241}Pu determination for emission and immission control of nuclear installations by aid of liquid scintillation counting 429

M. Pimpl, B. Yoo, I. Yordanova (Karlsruhe, Germany, Daejon, Korea and Sofia, Bulgaria)
Optimization of a radioanalytical procedure for the determination of uranium isotopes in environmental samples 437

K. A. Surano, G. B. Hudson, R. A. Failor, J. M. Sims, R. C. Holland, S. C. MacLean, J. C. Garrison (Livermore, CA, USA)
Helium-3 mass spectrometry for low-level tritium analysis of environmental samples 443

S. Hisamatsu, T. Katsumata, Y. Takizawa (Akita, Japan)
Tritium concentration in foods and human tissues: Estimation of mean residence times of organically-bound tritium in costal cartilage and sternum 455

R. W. Sheets, C. C. Thompson (Springfield, MO, USA)
Effects of polonium-210 on determination of atmospheric gross alpha-radioactivity 465

A. P. Summerton (Adelaide, Australia)
Natural radionuclides in tidal saltmarsh soils in South Australia – an unusual distribution? 475

D. Mascanzoni (Uppsala, Sweden)
Determination of ^{90}Sr and ^{137}Cs in mushrooms following the Chernobyl fallout 483

L. Romero, A. M. Lobo, E. Holm (Madrid, Spain and Lund, Sweden)
New aspects on the transuranics transfer in the Palomares marine environment 489

Chien Chung, Shen-Ming Liu, Cheng-Chang Chan (Hsinchu, Taiwan R. O. C.)
Environmental monitoring of ^{134}Cs in beach sand using a coincident spectrometer 495

Radioanalytical Methods in Studies on Radioactive Waste

D. L. Moir, A. Chatt (Halifax, Nova Scotia, Canada)
Studies on leaching behaviour of sodium borosilicate glasses by neutron activation: Effects of groundwater composition, pH, surface area to volume ratio, and temperature 503

P. M. Grant, P. Robouch, R. A. Torres, R. J. Silva (Livermore, CA, USA)
High-temperature spectroscopy for nuclear waste applications 527

T. C. Maiti, J. H. Kaye, A. E. Kozelisky (Richland, WA, USA)
Sequential separation of Pu, Np, U and Am from highly radioactive Hanford waste by ion exchange methods 533

T. L. Hardt, S. M. Schutt, K. S. Doran, D. L. Dihel, R. O. Lucas II, T. K. Eifert (Atlanta, Georgia, USA)
The radiological services laboratory: Designed for the future 541

A. P. Toste (Springfield, Missouri, USA)
Degradation of chelating and complexing agents in an irradiated, simulated mixed waste 549

E. Gantner, U. Kuhnes, H. J. Ache (Karlsruhe, Germany)
Monitoring of safety features, fissile material accumulation and concentration in nuclear reprocessing by active and passive neutron counting techniques 561

E. Ph. Horwitz, M. L. Dietz, R. Chiarizia (Argonne and Darien, IL, USA)
The application of novel extraction chromatographic materials to the characterization of radioactive waste solutions 575

D. Robertson, D. Haggard, C. Thomas, N. Wynhoff (Richland, WA, USA)
Radiological characterization of neutron-activated metal wastes from nuclear power stations 585
